

Name:

Subtracting from 1000 and 10000

Question 1

Terrance has \$1,000.

He buys a camera that cost \$530.

How much money does Terrance have left?

Question 2

There are 10,000 tickets for a stage show.

So far 979 tickets have been sold.

How many tickets are still available?

Question 3

To reach his sales target Ahmed needs to sell 1,000 cars.

So far he's sold 738 cars.

How many more cars does Ahmed need to sell to reach his target?

Question 4

A number of cars were washed on Monday. Morning: 596 Afternoon: ? Total: 1,000

How many cars were washed in the afternoon?

Question 5

Andrew has to peel 1,000 potatoes.

He has 146 potatoes left to peel.

How many potatoes has he peeled so far?

Question 6

The sailor has completed 9,967 km of a 10,000 km journey.

How far does the sailor have left in her journey?

Question 7

The total weight of two crates is 1,000 kg.

If the larger crate weighs 777 kg, how much does the smaller crate weigh?

Question 8

There are 1,000 balls in total in 2 boxes.

If one box has 428 balls, how many balls in the other box?

Question 9

There are 1000 students at Walker Street School.

553 are girls.

How many boys at Walker Street School?

Question 10

Sally has driven 7,007 km out of her 10,000 km drive.

How far has she left to drive?

Subtracting from 1000 and 10000 solutions

<p>Question 1 Terrance has \$1,000. He buys a camera that cost \$530. How much money does Terrance have left?</p>	<p>Solution To calculate how much money Terrance has left, subtract the amount the camera cost from the amount of money he had to start with. $\\$1000 - \\$530 = \\$470$</p>
<p>Question 2 There are 10,000 tickets for a stage show. So far 979 tickets have been sold. How many tickets are still available?</p>	<p>Solution To calculate how many tickets are still available, subtract the number of tickets that have been sold from the number of tickets originally available. $10\ 000 - 979 = 9\ 021$</p>
<p>Question 3 To reach his sales target Ahmed needs to sell 1,000 cars. So far he's sold 738 cars. How many more cars does Ahmed need to sell to reach his target?</p>	<p>Solution To calculate how many more cars Ahmed needs to sell to reach his target, subtract the number of cars he has sold from the number of cars he needs to sell. $1\ 000 - 738 = 262$</p>
<p>Question 4 A number of cars were washed on Monday. Morning: 596 Afternoon: ? Total: 1,000 How many cars were washed in the afternoon?</p>	<p>Solution To calculate the number of cars that were washed on Monday afternoon, subtract the number of cars that were washed on Monday morning from the total number of cars washed on Monday. $1\ 000 - 596 = 404$</p>
<p>Question 5 Andrew has to peel 1,000 potatoes. He has 146 potatoes left to peel. How many potatoes has he peeled so far?</p>	<p>Solution To calculate the number of potatoes that Andrew has peeled so far, subtract the number of potatoes he has left to peel from the total number of potatoes he needs to peel. $1\ 000 - 146 = 854$</p>
<p>Question 6 The sailor has completed 9,967 km of a 10,000 km journey. How far does the sailor have left in her journey?</p>	<p>Solution To calculate how far a sailor has left to travel in her journey, subtract the number of km she has completed from the total distance of her journey. $10\ 000 - 9\ 967 = 33$</p>
<p>Question 7 The total weight of two crates is 1,000 kg. If the larger crate weighs 777 kg, how much does the smaller crate weigh?</p>	<p>Solution To calculate the weight of the smaller crate, subtract the weight of the larger crate from the weight of the two crates together. $1\ 000 - 777 = 223$</p>
<p>Question 8 There are 1,000 balls in total in 2 boxes. If one box has 428 balls, how many balls in the other box?</p>	<p>Solution To calculate the number of balls in the other box, subtract the number of balls in the first box from the total number of balls in the two boxes. $1\ 000 - 428 = 572$</p>
<p>Question 9 There are 1000 students at Walker Street School. 553 are girls. How many boys at Walker Street School?</p>	<p>Solution To calculate the number of boys at Walker Street School, subtract the number of girls at the school from the total number of students at Walker Street School. $1\ 000 - 553 = 447$</p>
<p>Question 10 Sally has driven 7,007 km out of her 10,000 km drive. How far has she left to drive?</p>	<p>Solution To calculate how far Sally has left to drive, subtract the distance she has driven from the total distance she has to drive. $10\ 000 - 7\ 007 = 2\ 993$</p>
