

Constructing a Scientific Diagram

Name:

Date:

- 1) Observe a spider. Look carefully at its body parts. You can look at a specimen or photographs.
- 2) Draw a diagram of a spider. Try to make your drawing as accurate as possible.
- 3) Show your diagram to a friend. Listen to their feedback about how to improve your diagram.
- 4) Repeat this process a few more times with different friends.
- 5) Draw the final copy of your diagram in the space below.
