

My name is: \_\_\_\_\_

**What you need for this activity:**

Prepare the page for this activity by making slits along the dotted lines on the box. (Fold and cut with scissors or use a stanley knife.) Cut some paper strips using craft paper or bright wrapping paper.

**Fine Motor Skills Activity:** Paper Weaving.

Children may need assistance at first until they understand the alternating, over and under, weaving process. Begin by threading a strip of paper through the first slit from behind the page. Thread the strip over and down through the next slit. Continue weaving over and under to the end. Begin the next row with a new strip. Be sure to alternate the pattern in the new row. Once finished the loose ends can be tucked to the back, trimmed and taped in place.
