Did You Know?

It is almost impossible to sneeze with your eyes open.

The eye contains the fastest muscle in the body.

Newborns' eyes don't produce tears.

Drawing Eyes

Look at your eyes very carefully in a mirror, then draw your eyes below.

Don't forget to include your eyebrows and eyelashes. Did you notice anything interesting about the shape of your eyes?

Blinking Fact

Infants blink only once or twice a minute while adults average around ten.

Using a stopwatch to accurately measure a minute, count how many times at least ten people you know blink in a minute. Include adults and children.

Who blinked the most?

Who blinked the least?
