

Making Shadow Puppets

Name: _____

Date: _____

Use a thumb tack to make the holes.

Lay the body on top of the legs, matching up the holes.

Thread a short piece of wire through the holes. Twist to secure and tape on both sides.

(You could also use a split pin or tie thread to secure.)

Make wire rods to operate your puppet. Use thin wire and twist to make it strong. Tape one rod to each set of legs.
