# We Work At The Hospital

This is the emergency department. Really sick or injured people are brought here.

We are orderlies. It's our job to take patients to different parts of the hospital.

There are many wards in the hospital. Teams of doctors and nurses work here. The doctors and nurses look after many patients in the ward.

This is one of the places you might come to for tests in the hospital. We do x-rays and scans. Doctors study the results and advise treatment. Pathology tests help doctors prescribe the right medicines.

This is the operating theatre. Surgeons, anaesthetists and nurses work here.

This is the kitchen. Meals for the patients are prepared here. It's busy!

Hospitals need to be super clean. Cleaners wash, sweep or vacuum every day.

Hospitals are very busy places filled with people who help you when you are sick.
