

Volcano Experiment

WHY DOES IT HAPPEN?

Conduct this experiment outside.

What you need: Red food colouring, baking soda, vinegar.

step 1: Build a volcano using dirt, sand or modelling clay.

step 2: Place a spoon of baking soda into the well of the volcano.

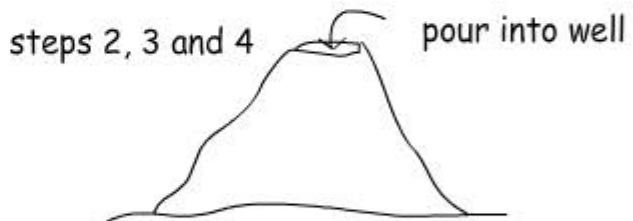

step 3: Pour a small amount of food colouring into the well.

step 4: Pour a cup of vinegar into the well and stand back.

step 1

steps 2, 3 and 4

pour into well

What happened?
