

# Clouds

Name: \_\_\_\_\_

## Cloud Facts

• Clouds are made up of millions of tiny droplets of water and ice.

• Dark grey clouds that produce rain are called nimbostratus clouds.

• The puffy clouds we often see floating in a blue sky are called cumulus clouds.

• Stratus are low clouds, middle clouds are altostratus, and cirrus are high clouds.

How many more cloud facts can you find?

## Complete the Sentences

\_\_\_\_\_ is simply a cloud that has formed near the ground.

Clouds move with the \_\_\_\_\_.

Without clouds there would not be any \_\_\_\_\_, thunderstorms, rainbows, or snow.

wind

rain

Fog

## Cloud Drawings

Make three separate drawings of clouds. Think about the colours and the mood of each drawing.

Drawing 1. Dark, threatening storm clouds.

Drawing 2. Puffy white clouds in a clear blue sky.

Drawing 3. A beautiful sunrise or sunset with the Sun projecting between the clouds.

Which drawing do you like the best?

Why do you like it?

## Writing a Narrative

Write an imaginative narrative (story) about the day when all the clouds disappeared and it was up to you to find out what happened and bring them back.

Plan your story.

Who are the people in your story? (characters)

Where does the story take place? (setting)

What things happen? (sequence of events)

How does your story end? (resolution and conclusion)

## Fractions

The grids below show my window and the clouds on four separate days.

How many eighths of the window did the clouds cover each day?
