

Frogs

Name: _____

Frog Facts

• Frogs are animals that belong to a group called amphibians. They live part of their life in water and the other part of it on the land.

• The largest frog is the giant or Goliath frog. It can be 30 cm long.

• Most frogs have a sticky tongue which they use to catch insects.

• Some frog species can lay up to 20,000 eggs at one time.

Do you know any more interesting facts about frogs?

Extension Research

Frogs and toads belong to the same animal group, but there are several differences. For example, frogs need to live near water, but toads do not need to live near water to survive.

Prepare a short report about the differences between frogs and toads.

Include drawings and pictures in your report.

Jumping

Certain frogs can jump up to 20 times their own body length in a single leap.

Place your feet together, crouch and jump like a frog as far as you can.
How far can you jump?

Life Cycle of a Frog

Make a chart showing the life cycle of a frog.

1. egg (frog eggs float)
2. tadpole (tadpoles hatch from the eggs)
3. froglet (body shrinks and legs form)
4. frog (lungs developed and legs grown)

Verbs

Verbs are words used to describe actions.

Complete each sentence with a different verb.

One frog **sitting**.

Two frogs **leaping**.

Three frogs _____.

Four frogs _____.

Five frogs _____.

Six frogs _____.

Can you write more than 10 verbs?

Number Line

If Freddie the frog jumps 2 cm each leap, how far will he go in 4 jumps?

If Fay the frog jumps 3 cm each leap, how far will she go in 3 jumps?

If Flora the frog jumps 4 cm each leap, how far will she go in 2 jumps?
