

CHANGING LANDSCAPES

Name:

Date:

Research Task:

How have landscapes changed over time?

Select one of the following famous landmarks. Investigate the forces that changed the shape of the land over time.

*Uluru, Northern Territory,
Australia*

*Grand Canyon, Arizona,
USA*

*Twelve Apostles, Victoria,
Australia*

*Mt Fuji, Honshu Island,
Japan*

*The Bungle Bungles,
Western Australia*

*Niagara Falls, Ontario,
Canada & New York, USA*

*Mt Everest, Himalayan
Mountains, Nepal*

*The Giant's Causeway
Northern Ireland*

*A local landform of your
choice*

Questions to consider in your research:

- 1) Where is the landmark located?
- 2) What type of landform is it?
- 3) When was the landmark formed?
- 4) What forces played a part in the formation of the landmark?
- 5) How has the landmark been weathered over time?

Questions to consider in your presentation:

- 1) How will you present your findings?
 - A slideshow discussion
 - A wall poster
 - An information report
- 2) How will you explain the mechanical forces that built the landform?
 - A demonstration
 - A diagram
 - An illustration
